

Snowmobile Safety Training Course Information 2016-2017 Season

MnUSA receives many calls and requests at our membership booths and at the office for information on snowmobile safety training. In addition, we would like to be able to include the information on our web site. MnUSA prepares a schedule of the information received from the clubs and that is used to answer questions and provide contact information at the booths and from the office. In the past, these lists have been provided to snowmobile dealers.

If you do not want your safety training information put on our web site or distributed on our written schedule, please advise us of that fact when you return the class information to MnUSA.

Please complete the course information set forth below for each class you are giving and provide it to the MnUSA office by phone, fax, email, or mail.

Reflective helmet decals have been purchased by Minnesota Snowmobile Education and Advancement Fund (MSEAF) and are available for distribution at your safety classes. If you would like the decals, please indicate how many you will need for your class.

County: _____

City (class location): _____

Contact Person(s): _____

Phone Number(s): _____
